

# 1 Using Gradescope

**Task:** *Draw a right triangle. Put a circle around the right angle, that is, the angle that is  $\frac{\pi}{2}$  radians.*

**Preparing your submission:**

- Complete the assignment using your choice of technology. You may write your answers on paper, write them electronically (for instance using OneNote or xournal), or typeset them (for instance using LaTeX).
- If using software, please export to PDF. If writing by hand, please use a scanning app; Gradescope offers advice and suggested apps at this URL. The preferred format is PDF; photos or JPEG scans are less easy to read (and much larger), and should be used only if no alternative is available.)
- Please make sure that your file name includes your own name and the number of the assignment, such as "DrayHW2.pdf."

**Using Gradescope:** To submit an assignment:

- (a) Select Gradescope from the left-hand panel in Canvas.
- (b) Select the assignment called "Sample Assignment"
- (c) Follow the instructions to upload your assignment. (The preferred format is PDF.)
- (d) You will then be prompted to associate submitted pages with problem numbers by selecting pages on the right and questions on the left. (In this assignment, there is only one of each.) You may associate multiple problems with the same page if appropriate.
- (e) When you are finished, click "Submit"
- (f) After the assignments have been marked, you can log back in to see instructor comments.
